## Traditional Series Huntington Pole

### Available in base plate style

The design of the Huntington pole dates back to the 1920s when similar styles were installed throughout Southern California. When many of the vintage poles were damaged in an earthquake, we were asked to replicate the classic design. Our version features important structural advancements including prestressed steel and centrifugally cast concrete for ultimate strength and long term structural integrity.

This timeless design complements both traditional and contemporary settings. Our Traditional Series lighting poles combine the charm of yesterday with the technology of today. Available in a wide variety of styles, colors and finishes, these poles provide architects and designers with many creative options.

### Features and Benefits

- Prestressed steel and highest quality concrete are centrifugally cast for ultimate strength and durability.
- Natural stone and terrazzo aggregates maintain a like new appearance with virtually no maintenance.
- Conforms to applicable sections of ACI, AASHTO, ASTM, and IBC standards.
- Exclusive 10-year warranty

### Colors and Finishes

A wide range of standard, pre-formulated and custom colors are available. The concrete shafts are lightly blasted to expose the texture and color of the natural stone. See separate Aggregates and Finishes sheet for details. We offer Amershield™, a premium graffiti-resistant coating, as well as other durable sealers and protectants that further enhance colors, protect the concrete surface and aid in the removal of graffiti.

### Durability with a classic touch.
